Experience

Software Engineer - Python/GenAI

Jun 2025– Present

GrayMatrix

Python, FastAPI, Javascript, Node.js

- Developed an agentic social media automation system that autonomously generates and publishes content across **Twitter**, **LinkedIn**, and **WhatsApp** using **Veo 3**, **Imagen**, and **GPT-4.1**, streamlining content creation workflows.
- Designed and implemented **LLM fine-tuning pipelines** for internal business applications using **LoRA** and **QLoRA**, improving domain adaptation and model performance.
- Configured and optimized a **GraphRAG workflow** using **FalkorDB** and **Neo4j** to enhance knowledge retrieval and contextual relevance across multimodal datasets.
- Implemented modular **knowledge-ingestion pipelines** supporting custom chunking strategies for flexible, domain-specific retrieval in RAG systems.
- Researched and evaluated **AI safety frameworks** such as **NeMo Guardrails** and **Guardrails AI**, assessing their integration to strengthen reliability and compliance in GenAI systems.

Senior Full Stack Developer

Oct 2024– May 2025

UnifyXperts

Python, FastAPI, Javascript, Node.js, Frappe

- Developed a Real-time Delivery System for Amazon Marketplace using **AWS SQS**, **Secrets Manager**, and **Lambda**, improving delivery efficiency by 35%.
- Led client consultations for over **5+ projects**, provided accurate estimates, and ensured project deliverables aligned with business goals
- Improved the hiring process, increasing candidate screening efficiency by **40%** through **structured KPIs**.
- Conducted 10+ **code reviews** to uphold best practices and maintain code quality and maturity
- Contributed to scaling and expanding the company's technical capabilities, leading to a **25% increase in project throughput**.

Full Stack Software Developer

Oct 2022– Oct 2024

Fafadia Tech

Python, FastAPI, Javascript, Node.js, Frappe

- Helped design and develop a agentic for the social media **business workflows** for an **e-commerce platform**, improving efficiency in inventory management, finance, and marketplace integration.
- Automated financial, logistics, and customer relationship management processes, reducing manual effort by 40%.
- Developed **real-time fulfillment tracking workflows** for retail clients,enhancing order processing speed and accuracy by 20%
- Built a **React Native MVP app** for a news aggregator platform, utilizing **React Native Paper** for styling and **MMKV** to provide offline access and increase usage fluidity by 38%
- Consulted with clients to analyze pain points and develop tailored technical solutions, resulting in a **20% increase in operational efficiency**.

Internships

Full Stack Developer Intern

Jul 2022– Oct 2022

Fafadia Tech

- Gained hands-on experience in business process automation and workflow optimization.
- Conducted on-site field visits to material packaging facilities to automate their operational workflows.
- Refactored and maintained legacy codebase, improving application performance and maintainability for certain workflow by 68%

Skills

- Programming Languages: Python 3, Javascript ES6 and Java 17
- Database Technologies: MariaDB/MySQL (SQL) and MongoDB(NoSQL)
- Backend Technologies: Django, Frappe (v15), Fastify, FastAPI
- Frontend Technologies: React.js, React Native, Vue.js, Astro
- DevOps/MLOps: AWS, Hetzner, Sentry and Grafana
- CI/CD Tools: Docker, Jenkins and Github Workflows
- AI/ML Frameworks: Langgraph, PyTorch, NVIDIA NeMo

Education

SIWS College

Jul 2019 – May 2022

Bachelor in Computer Science, Passed with 9.47 CPGA

Notable Project

E-commerce Marketplace Aggregation System

Dec 2023– Present

Backoffice Implementation

Python, Javascript, AWS

- Engineered a **back-office aggregation system** to centralize retail and e-commerce marketplace functionalities, handling **1000+ daily transactions**.
- Integrated **5+ marketplace APIs** (e.g., Amazon, Walmart) to streamline **inventory management and order fulfillment**, reducing processing time by **30%**.
- It is part of company-driven initiative and was presented project insights at **Frappeverse Framework Event**
